A Few Words regarding Fungi & Foe

Fungi & Foe are a bass/drum duo in the sense of the bands Lightning Bolt, Royal Blood, Death From Above 1979. The basic structure of the songs are playful, groovy drums and a hard, percussive played electric bass (among others a 6-string without frets). Different samples from film quotes, noise elements and vocals are added on top of the grooves and build an intense, atmospheric mixture.

Fungi & Foe provide both a unique musical concept and visual live performance, including video performances by David Firth and own productions. Especially as support band they can heat up the crowd and provide the necessary atmosphere for the main act. Since the band can also offer a 1-hour set of PRIMUS cover songs, it would also be possible to include the band in a "tribute" event.
